Cuban exiles in Jamaica plan to assassinate Cuban Premier Fidel Castro when he visits Kingston late this month, according to a secret U.S. intelligence report.

It is not known how seriously U.S. officials take the report which was apparently uncovered by U.S. attaches in Jamaica. Cuban exiles in Miami are held to be masterminding the plot.

Report speculates exile group may be the same one Castro blames for staging armed attacks on Russian and Cuban fishing boats in the Caribbean.

White House says Justice Department will prosecute any Cuban exiles living in this country who become involved in anti-Cuba violence.
